

## Flexibly Meets the Needs of Individual Students

### Rigby honors the teacher as the professional

**We provide the tools—the teacher chooses the plan based on student need.** The teacher decides when and where each student needs additional support in phonemic awareness, phonics, vocabulary, comprehension, or fluency.

### Customized intervention made simple

- The **Data Management Tool** provides an instructional report that suggests a course of instruction based on individual assessment.
- Daily **Teaching Cards** support 45 minutes of **Core Instruction** in phonics, vocabulary, comprehension, and fluency *plus* 15 minutes of **Optional Instruction** based on the student's key area of need.
- Alternate **Teaching Cards** support 45 minutes of instruction for any student whose key area of need is phonemic awareness.
